

Laura Triendl

I am a student born in germany who has great concerns, that projekt Jupiter is a horrible idea and should be stopped. Yes profit bla bla bla i get it but when there is no more drinking water and no more shade shielding you from the rising Temperatures because you chopped down all trees to make space for your data centers, i ask you, how will you survive? You cant eat and drink money or build a shelter out of crypto so please be humane and stop destroying our planet and its recources for other humans. You can be wealthy in other ways, this is not a longterm solution.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
