

Abegail Salugsugan

Hello, my name is Abegail Salugsugan and I have lived in District 1 for most of my life, and I am commenting to ensure that these air quality permits are to be rejected. The scale of Project Jupiter will have a detrimental effect in Santa Teresa as well as the surrounding areas. These extractive projects are not welcome in New Mexico. Santa Teresa and New Mexico deserve clean air, just as much as Santa Teresa and Doña Ana deserve clean water. A public hearing in Santa Teresa should be held if the permits are not denied, and ensure there is a virtual option so that constituents can participate and ask questions.

These permits do not make sense, as they are useless due to the pipelines being rejected by NM Land Commissioner. Methane gas cannot be delivered without the pipelines that have been rejected. Please reject this air quality permit.
