

Leslie Moody

Please oppose this project. As a New Mexico resident and small business owner, I find it outrageous that an energy and water hog of this magnitude would even be considered in this state. This out of state mega-corp has completely abused our public process by forging letters of support, using NM residents' info without permission, and outright lying about everything. They may have billions of dollars on their side, but they are morally and ethically bankrupt. They have no place doing business in our state.
