

Kashka Calvin

I opposed project Jupiter being passed. The health concerns the environmental concerns and the finance concerns outweigh the projected benefits. Also every other data center that's been built thus far has lied about there power usage water usage and environmental impact. The air quality permit application should be denied. A public hearing needs to be held in every county that will be affected. Dona Ana air quality is already among the worst in the nation and approving Jupiter with its air pollution projections would make Dona Ana uninhabitable.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
