

Cooper smith

Hi, my name is cooper, I am 15 years old and I want to take action against this project. As a 15 year old going into my sophomore year of high school, I want to say I'm scared for my generations future. Every AI data center hurts our planet, more and more. The planet is not dying, WE are killing it, just from the data centers being BUILT is killing the planet, half of these centers aren't even built yet and look at the harm that it's causing. I SHOULD'NT EVEN BE HERE TALKING ABOUT THIS, I SHOULD BE IN SCHOOL LEARNING, CREATING, AND INNOVATING. I should be focusing on my future, not sitting here having to tell ADULTS that what they are doing is killing the planet.
