

Lyn Hoffmann

As a Dona Ana County Resident, I am completely opposed to building a large data center, such as the Jupiter Project, in our arid and sensitive environment. I agree with others that have concerns about environmental impacts, such as air quality and water use. The desert ecosystem has a long history of abuse because developers see it as useless barren land. Our deserts need to be protected from the ignorance of the greedy that have pushed this project through quickly with little care for the adverse consequences for nearby residents, humans, plants, and animals that call this area home. I urge you NOT to approve this proposal or any other proposal associated with Project Jupiter. Lyn Hoffmann
