

Miguel Fonseca

Please reject the data center of projects Jupiter. It will cause environmental harm even if they propose "fuel cell technology" It will likely not matter and it cause more droughts and less pressure water for citizens in Donna ana county, please reconsider the drawbacks and environmental cost of this. If they do SUE Donna ana county for not letting them putting a data center here that is all that you need to sue them back because if they are willing to sue and just take it anyway. That is proof that they really don't care and it's just money and greed. I am also aware that New Mexicans are saying they find replies online that they support this but really they did not.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
