

HARRY KENNEDY

There is far too much risk to proceed and I feel that NM needs to stop and evaluate for 1 year. Convene a board from various positions and provide all sides so the public can know what's happening.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
