

Kaiya Bruce

I strongly oppose Project Jupiter. This project is a disgusting proposition in and of itself. In a time where Earth is the most vulnerable and the working class's access to important resources is failing to be guaranteed, even the idea of this project is enough to make one sick to their stomach. A data center as large as Project Jupiter is building would release 10 MILLION TONS of carbon dioxide annually, suffocating ecosystems and destroying our atmosphere. It would consume millions of gallons of drinkable water, draining the surrounding communities of their water supply. Project Jupiter claims to be host to thousands of jobs and claims to be for the welfare of the working class, but in reality, it is literally draining the life out of the people of this country and the Earth itself. Stop Project Jupiter now.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
