Please do not let project jupiter get passed. The negative environmental consequences it will cause are far too dangerous to approve this project. Local communities will be exploited for the resources they survive on, heat emissions will skyrocket, and the limited clean water will be disproportionately taken up to cool this massive data center. The earth is our only home, so please take better care of it.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
