

Victor Soto

While I am not from New Mexico, Oregon is facing similar challenges as a data center is planning to be built in Forest Grove. People need a healthy environment to stay healthy. Every person needs water to live. We don't need AI. Average day people were fine without it. It is an unwanted welcome in our lives. Protect the scarce land we have, protect our homes across the country. Children don't deserve the future being built. Don't build this data center

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
