

Mathew Martinez

I am strongly urging bureau to reject this permit for the reason that we as a community do not need more data centers. We need a lot of things and more data centers is not one of those necessities, the environment has been on a slow decline and another data center would put us at rock bottom. We need to focus on preserving and maintaining the future of our environment for generations to come.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
