

Linda Van De Rostyne

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air. Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing:

Cancer-causing chemicals (benzene)

Heavy metals (lead, arsenic, chromium)

Toxic compounds (sulfur and others)

All of these poison the human body, our water, and our soil.

New Mexico Environment Department's (NMED) mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations."

NMED's Air Quality Bureau "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality."

Please follow your agency's mandate. Protect New Mexican families. Deny Bloom Energy/Yucca Growth Infrastructure/Project Jupiter permit application.
