

Chris Martín

NO on Yucca Growth Infrastructure Air Quality permit, a.k.a. "Project Jupiter".

There is NOT ENOUGH WATER to support this. Consumers are put on flow-restrictors and watering schedules to conserve water, but then NM is considering opening the sluices for Oracle/Project Juniper?

We are having record heat and drought, but are thinking about adding this veritable furnace to our desert?

No.

Water can't be replaced.

Please DO NOT APPROVE this permit.

Thank you.

Chris Martín
