

Alberto del Campo Hernandez

I am a resident of Dona Ana and I'm asking that you deny Yucca Growth Infrastructure's air quality permit. This project's emissions will be devastating to our ability to thrive in the state of New Mexico. I have plenty of family members who have been suffering from cancer and other health difficulties precisely because of the developments of projects like this. We are already living in an extraction zone, with oil and gas industries sacrificing us for wealth.

This project will contribute significantly to the rising temperatures in this area, making it near uninhabitable. I want to grow old and raise my children here, so I am once again asking NMED upholds its mission and deny this application. I don't trust OpenAi, Oracle or Bloom Energy's track record illegally disposing of hazardous waste.

Approving this permit would be sacrificing the borderlands, and nothing short than environmental racism.
