To Whom It May Concern:

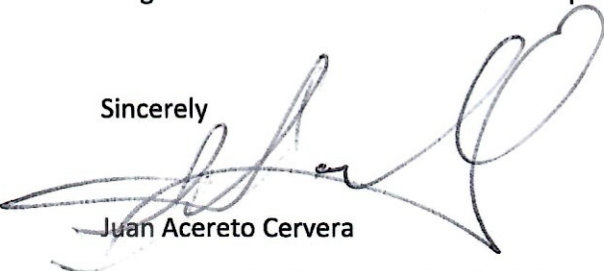

I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community.

Project Jupiter represents a transformational opportunity not only for Doña Ana County and Southern New Mexico, but for the broader Borderplex region, including Ciudad Juárez. The project is expected to generate substantial economic growth through the creation of approximately 4,000 construction jobs and 1,500 long-term project-supported jobs, strengthening the regional workforce and expanding economic opportunity on both sides of the border.

Beyond direct job creation, Project Jupiter is positioned to enhance the economic integration of our binational region by increasing demand for suppliers, logistics services, advanced manufacturing, and cross-border trade activity. For Ciudad Juárez, this presents meaningful opportunities for industrial collaboration, supply chain expansion, and continued growth in sectors that rely on the strong economic ties between Mexico and the United States.

I urge the New Mexico Environment Department to approve this important project.

Sincerely

Juan Acereto Cervera
