

Cameron Stoker

I am strongly opposed to the granting of this permit -- as a NM resident I do not believe this state's fragile ecosystem can support more pollution release in the form of heat, CO₂, NO_x and noise. The desert areas are sparse in wildlife because of the scarce resources and any additional burden on this area will reduce plant and animal numbers and variety. I am additionally opposed to increased water usage for this project, though that may not be in the scope of this review. Please support the will of our state residents over the out-of-state corporations.

Thank you.
