

Vaughn Jones

I vehemently disagree with data centers expanding in New Mexico and everywhere. Speculative markets are not more valuable than the lives of people and the health of our environment. Put your capital to something that will actually be of use and improve the health of our communities and environment.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
