

Keegan Randel

We don't need an ai data center. We have as little water here as is, and we don't need a cancerous leech sucking away any more of our already scarce resources. There's nothing good that comes from ai, it gives no one jobs, makes garbage that any dimwit with an iPad can make better and more artistic. Flat out there is no reason for an ai center here, it does nothing but kill the ecosystem and produce slop that no one cares for. Just stop it. I know you got your \$300 billion check from the gop, but you aren't even worth a penny of it. Fuck ai, let it die.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
