

Kira Tan

Why sacrifice innocent communities for a machine that will probably be abandoned in 10 years time? Data centers are wasteful, useless, and not good for long-term. We are destroying our own planet, and for what? AI-generated videos that'll bring us temporary joy? Please stop this now before it's too late. Before our home literally crumbles right before us. Thank you for all of the programs out there that are trying to stop this.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
