we need to stop project jupiter, the politicians clearly do not see it yet, but it will destroy our environment and cause big harm to the area close to the data center. it will make it harder for us to reverse the global environmental damage which will lead to an even greater mass extinction than now, for both animals and humans because we do not get enough time for our bodies to adapt to this type of climate. please hear us out and listen when we tell you that we all really need you to take this seriously and cancel project jupiter, for everybodies sake, before it's too late. by approving this project it will be an act of environmental rasism, considering Doña Ana County's bad quality air, not reaching the federal government rules. in addition, the public should be given at least 60 days to comment and review the air quality permit so community members can participate equitably. the air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. if for some reason the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. sincerely,
anonymous.
