This world does not need AI. I am terrified by the effects. I am angry that the billionaires and Americas current administration do not care about what will happen to our Earth. They know what will happen and they have absolutely no remorse, no mercy, and no morals. I feel my voice being taken away from me as well as my future. I haven't graduated high school yet, I haven't seen even a fraction of this planet and my fear is that it will be to late. My generation will have to bear the weight, the consequences, we will be the ones living in a burning world. Without air, running out of freshwater, burning temperatures and extreme weather. My children are going to live in the corpse of mother Earth. I cannot sit by and watch the mega ultra rich burn my land, water, and future. WE DO NOT NEED AI WE DO NOT WANT AI BAN THE DATA CENTERS!
