

Lily Dunning

I do not support project jupiter! this is not something we need and it will be harmful to our communities and the people we love. This will use up way more water then it needs to and will take that resource from other around the world and we are already struggling.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
