

Alison Janes

Please reject Projects Jupiter's proposal once again. The fight to keep our communities and land from being further extracted will not end here, but we can continue it with this rejection. If you feel any inkling of these ongoing proposals wearing you down, please look to us your community for support. We can have each other's backs right now to go slow and go far to stop further extraction.

Please continue your mission to protect and restore the environment, and listen to the communities living in and near these environments. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

This permit carries risks that are too high. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Thank you for your continued commitment to our communities and to the environment.
