

Laura Jaramillo

I ABSOLUTELY am against this horrible idea. Not only because of all the negative environmental impacts, but the shadiness of the entities aggressively and unethically pushing it. They are willing to employ MANY people to swarm residents out in the community just going about their day, and gaslighting them into giving personal information like their names and email addresses. They are then abusing the information to falsify comments on this very site in favor of the project! This is absolutely concerning and absolutely despicable! This says volumes about their character and greed. THIS SHOULD BE INVESTIGATED TO THE FULLEST EXTENT OF THE LAW. Please take their actions as evidence that they have unethical and deceptive intent, and they should NOT be granted the permit nor the permission to destroy our communities. They should not be allowed to further deceive and exploit our state! We as a state have far more to lose from this project than we have to gain. This project is going to devastate our community with all forms of pollution, not only air quality. There will also be noise pollution, as well as every other kind possible. It will displace wildlife, destroy their habitat, and lower property values all along the proposed path, with ripples that affect the whole area. All to line the pockets of out of state billionaires. They aren't building these things in their backyards... think about that for a moment!
