

Stay Out

Project Jupiters unwillingness to cooperate or even communicate with the community its extracting from is bad business and shows the lack of respect they have for us. Even before the building is up, they dont have majority NM construction workers on site. Going on site youll see rows and rows of TX plates.

What about the emergency well that had to be dug? What other emergencies will come up???

Project Jupiter is shady and its tenants have long time records of stating that their drive is profit. Get the hell out of our community.
