

Jack Barkhurst

As a New Mexican, I say NO to new data centers for AI that are stripping our communities of a future that has abundant water supplies and clean air. Project Jupiter is misleading and could use up to 1 MILLION gallons of water PER DAY. A figure almost 20x the previous estimate given by the developers. As this project will be powered by gas generators it is in NO way, shape, or form a sustainable project. It will continue to pollute our communities that suffer from poor air quality and extreme heat due to the worsening climate crisis. If Project Jupiter is completed it would be a betrayal to New Mexicans. As a young person, 19 years old, I feel helpless in what I can do to secure a livable future for myself and my community. Please stop leaving this burden on the youth and make a meaningful difference if you have the privilege and power to do so. We are so tired.

Don't let us down,
Jack Barkhurst
