

Erica Christensen

I am asking that the air quality permit be denied, as the air quality in Santa Teresa is already poor, and approving this permit would negatively impact the health of local residents. Additionally the public should be given more time, at least 60 days, to review and comment on this decision. If the permit is not denied, there needs to be a public hearing about this issue so residents can be informed about what exactly is being proposed, and can have their concerns heard and considered.
