

Juleima Jaquez

I have been a resident of New Mexico my whole life and plan on staying here for the rest of it. I love my state and I am deeply concerned about the already dwindling water supply that we have in this state. Building a giant AI data center that hoards all of the water is just not sustainable in a desert. I am also concerned for the air quality and environment. Our state has already been used and abused so many times for its vast uninhabited land and I do not think it should continue to be taken advantage of in this way. This AI data center will cause more harm than good to the local residents.
