

anonymous anonymous

Dear NMED staff, I am writing this comment as I am deeply concerned about the negative impact of Project Jupiter. I am not from New Mexico, but it does not stop me from absorbing the information about what can happen if this project is not stopped immediately. I know that it is now harder to control the people responsible for Project Jupiter, but please, reconsider the effects this and many other initiatives of this sort can have on our planet in the next years. Sincerely,
Anonymous, PL

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
