People Over Profits! We cannot afford the water that these centers will use. We can not afford more emissions from these centers. Temperatures are already increasing at dangerous rates. Centers like this will speed up global warming. WE are already on borrowed time.

New Mexico is often used as a playground for experimentation, for example, Epstein's breeding center and the Atomic bomb. Our communities are still recovering from how we've been victimized. The health ramifications for our citizens will be disastrous. Studies have already shown that data center water has carcinogens.

These centers DO NOT generate enough jobs to warrant risking water accessibility and polluting our air.

Please reject Project Jupiter. We cannot breathe data. We cannot drink data. This project will kill New Mexicans.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
