

Alexandra Clark

Dear NMED staff,

My name is Alexandra and I am writing to you about my concerns Project Jupiter poses to our great state. I am a Las Cruces resident and understand the impact this project has on all of us living here. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Dona Ana County. We live in the south west and already face many challenges in environment including water shortages. This projects fuel cell powered grid will produce high levels of greenhouse gases and toxic waste. This directly affects those of us who live here and the surrounding communities. I urge the NMED to outright reject YUCCA Yuca Growth Infrastructure, LLC's air permit application for the YGI microgrid. I also ask the department to hold a bilingual public hearing near the Santa Teresa community can learn about the risks associated with fuel cell technology. Please do the right thing for the residents of this state.

Sincerely,

Alexandra Clark
