

Teresa Louis-Tomlinson

We need to stop the construction of data centers throughout our state. We do not have the resources to support them. Our water supply is already at risk, and we need to have clean air to breathe. Data centers would put us all at risk. We can't eat, drink, or breathe data!

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
