They're taking our future from us before we even had a chance to live in it. Every day I fear that the world that I saw when I was a kid won't exist anymore, I'm scared. They shove datacenters, ai and changes down our throat and expect us to accept that this is the way that it is, it doesn't have to be. A world where machines take priority more than life itself, is not a world I want to be a part of. How long will this go, how far are they willing to take this just for the sake of a pretend advancement that is throwing us years back. When will it be enough? When will they be finally satisfied? The life that surrounds us shouldn't be the one paying the price of our own foolishness, humans are the only species that seem so focused on destroying themselves over a system they are the creators of in the first place. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
