

Dexter Hafdahl

AI is inherently bad for humanity and Earth. The data centers further commit matricide against the planet that gave us refuge against the cold wastes of outer space and fed us and gave us nutrients and freedom and intelligence. The "art" AI creates is not true art. There was no effort or soul or feeling or thing to communicate. There is no society if it can not spread ideas through art. I live in the continental deciduous forests of North America. It has been very hot out recently. Sometimes too hot to go outside for more than a few minutes. It's not supposed to be this hot and dry.
