No, this project will not just destroy america and damage the USA's environment, but it will affect the whole world which is why i am writing this. The world is not theirs to destroy, it has never been, and we need to take action now to stop this. The world belongs to over 5 million to 1 trillion Different species and one of them being 8.3 billion humans. Earth was made to give us life and security, and we are destroying the only thing we can call home. The only thing all species in the world can call home. There is no planet B and building a data centre and destroying nature that can be used for animals and the ecosystem will damage and destroy more than we can even imagine. Stop this now or we are truly lost. Think about our future, our children's future and our grandchildren's future and beyond. Take action now to prevent bad. Stop fighting each other and try to be „better“ begin working together and helping one another to ensure a safer and more secure future, environment and safety for all. To whoever is reading this, please consider that this might be the start of an immense downfall and that having president trump in office will not ensure a stable future, but one who cannot accept that climate change is real, and it IS real. European weather conference are living proof. Thank you for caring for the planet, people and animals.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
