

Jason Begin

I STRONGLY oppose this horrid project and their permit application. This company has not shown itself to be capable of operating in an honest, open way. There are no assurances that this project will be safe or sustainable. The petition process has been abused and corrupted by Oracle, as they've failed to submit an unknown number of "opposed" comments, submitted via PJ canvassers. And other "opposed" comments were change to supportive comments.

There must be an investigation into these facts before the petition comments can be weighed.
