I have been a citizen in Doña Ana County my whole life , it has roots in my family that cannot be taken away , however this data center makes me worry if living in this area will someday not be worth it , i would hate to leave my community for something so utterly useless to the people of this country. I am 110% against this data center and if this community was more informed about the voting schedules of their own county then we wouldn't have these centers to begin with , its disgusting to see these things go through without more push back , even knowing its not anything people want .

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
