

Rylie Willson

The construction and use of data centers is a horrible waste of money and water supply. I do not and will not support these AI data centers because they are a failing money grab from the biggest corporations that literally destroy our water supply because they use the most harmful method of cooling possibly just because it's cheaper. Our lives are not cheap. Our planet is not cheap. We need to stop the construction of all of the AI data centers, and this one is no exception. Going forward with the construction of this is a death sentence to our planet. If you care at all about human lives or our planet, you will stop this AI data center immediately. Don't be a punk ass bitch whose morals can be bought.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
