

Isabel Dalton

To whom it may concern,

I am a resident of New Mexico and I am extremely concerned about the impacts that allowing this permit would have for our entire state. We do not have enough water as is, adding a facility that requires vast amounts of water will hurt our futures by not providing water for our crops and for the wildlife. Additionally, the strain on our power grid will impact everyone across the state. This data center is could drive up prices of electricity and use our water for what gain? To produce some AI cat video? I do not believe this benefits New Mexicans and that is very clear from the beginning of how this LLC has treated our Indigenous people by using Acoma for the name, which thankfully they have now changed. Additionally, there have been reports that names of New Mexicans are being used to support the data center, who NEVER supported it. This raises serious concerns about their practices and how they treat both our citizens and how they will treat our land. I was born in New Mexico and I intend to die here along with the other countless generations of my family who have been blessed to do the same. However, I will not be able to do that if the land and are polluted. Please do not allow this development to happen for my sake and for the sake of our children.
