We dont need anymore ai, the planet is on the verge of collapse and nobody cares. Its infuriating how the riches dont respect the planet they live on at all. Quite literally the rich get richer but they dont even donate SOME of the money they make. We have billionares trying to be trillionares while others are running out of clean water, dying everyday because of heatwaves and we all know whats causing them to be so frequent today, air being so polluted that youre just breathing toxins at this point and also animals practically getting banished from their homes so data centres or whatever bs can be built there. AI Is drying up land , using clean water, taking over peoples jobs, but thats something yall are not ready to hear. This is mad, and if YOU support ai and other things, you are slowly killing YOURSELF , no explanation needed.
