

Bernadette Hardy

Oppose AI PJ Data Center

My name is Bernadette Hardy. I am Jemez pueblo/Diné and a resident of Bernalillo County district 3, Currently I live next to KAFB where we witnessed and live with the health impacts of a superfund site! district 3 has been subject to jet fuel spills, contaminated air, toxic ground water and toxic soil and now NM is under threat from Data centers! I know this area well where Project Jupiter is being built. Years ago, I attended El Paso Community College near Vinton where I lived with my family. This rural area is different but special, the cattle, farms, orchards, and people of Sun Land Park and surrounding areas do not deserve this. This behemoth data center threatens the fragile eco systems and life ways of the surrounding communities. The harm outweighs anything Project Jupiter lobbyist have shared with you. We have yet to know the long-term health effects of data centers and that should be concerning to you. Data Centers won't create the promised permanent jobs; research shows that the residents foot the bill! Higher electric bills, higher water bills, increased cancer rates and not to mention the toxic produced water that comes from data centers, where will that water go? Research shows property values plummet when a data center is built next to homes.

Project Jupiter AI Data Center is not ethical, not environmentally friendly and not fiscally responsible and the people that live there do not want it. Please Oppose Project Jupiter. Thank you.

Respectfully,

Bernadette Hardy
