

John Marston

NMED,

I am writing in order to urge you to outright reject Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. This project is nothing short of evil, all for the sake of money for the big juicy companies who couldn't care less if their project seriously harms and kills hundreds of people. New Mexico does not want this project anywhere near here in the state. In any case, the companies behind this have continued to falsify comments of support. Same exact message, all submitted at the same exact time. Cheaters at the start, at their core, and to the very end. Disgusting.

Reject project jupiter.

-John Marston
