

## Carmen Kenehan

YGI's application should be denied because they failed to include information about Bloom Energy's problematic history. Bloom Energy's fuel cells are not clean energy and no matter what they say fuel cells generate pollutants and hazardous solid waste. NMED should also give the public 60 days to review and comment on application to insure everyone can meaningfully comment and participate. Dona Ana residences already bear a disproportionate share of negative environmental consequences compared to the rest of the state, permitting any microgrid facility is an example of environmental racism. If NMED does not reject YGI's application NMED should hold a public meeting in Spanish and English both in person and hybrid in Santa Teresa.

Sincerely,  
Carmen Kenehan  
Resident of Dona Ana County
