

## Aela Culver

Reject Project Jupiter! Our water, our air, our lands are not for the use of corporations to make money, they are for everyone to live. No matter the strategy and no matter how it's spun, AI data centers are extractive and harmful to the lands, Wildlife, and people who live and depend on these ecosystems. Do the right thing. Show the people who you represent that you truly do have their best interests at heart, not those of corporations.
