I am turning 16 in a month and 25 days. I don't know if there's a point to grow older if this is my future. This project devastate the forest, ecosystems, animals and water supply. It'll release unprecedented amounts of CO2 into the air that we won't be able to take back. This project will directly lead to horrific consequences that we won't come back from. We're already in a climate disaster, this will push it to the edge. There is no need for Ai, humans have been here for 3 billion years, we survived and thrived for 3 billion years and never once needed Ai. And we don't need it now. All you care about is money, but you cannot eat money.
