

Isabella Marchione

People are going to die from what will happen if this goes through. It will create irreversible damage and ruin the lives of millions and spread amongst the people, ending up ruining the lives of everyone on our planet due to their greedy and selfish disgusting actions. This capitalist mentality is the reason why people can't shower, can't drink water, and can't use water for their meals if needed. At the end of the day the people will win out over the pigs which are unfortunately given 'control'. But the real control lies within the people, and we will take back and destroy all that the money-hungry corporations and politicians have created out their own need to grow beyond their means. Deny the air quality permit application from Bloom Energy, they've never cared about the environment before when they dumped hazardous waste onto the land as if it were nothing to anybody. If you happen to not deny it then hold a public hearing in Santa Teresa so that the people might make a decision themselves, make it accessible by doing so in Spanish and English and offering a digital version for those hard of hearing. If you approve this hearing, you will be support government backed environmental racism, allowing the people of Doña Ana County to be further disproportionately affected by the lack of care of the land. They have been considered a 'nonattainment' zone because of the governments carelessness and this will only further prove it.
