

Serena Straiton

Hi, My names Serena and I've come from NZ to help make change so we can protect the wildlife of the globe. I am 18, I only just started my adult life and yet it's nearly already over. My job has been taken by ai, my career path I've wanted as a child has been taken by AI and yet I still push through. I adore animals, New Zealand's native animals are our nation, they are heavily protected and we need to protect other wildlife too to prevent anymore deaths of the animals that were here before us. We killed their homes, abused their land for years, they were here first and yet humans have managed to scalp them of their own needs. I fight for change for Animal's to have better homes and to feel safe in their own environments without the greed of power and the love of it too. Thank you for reading, haere ra.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
