

Mira Guilty

Under no circumstances should this be allowed to happen. Not only does this greatly affect our air quality, but it affects our water supply as well. Climate change is a huge problem, and the fact that we, as human beings are still convinced that we should make it worse just goes to show how pathetic humanity has become. If we give them an inch, they will take a mile. Making the earth uninhabitable should have never become something we have to discuss. This is non-negotiable. This is the coldest summer we will experience in our lifetimes. Do you understand that? It is all downhill from here, and we have the opportunity to stop while we are ahead, so why don't we? Let's use our brains! This cannot continue. I REFUSE TO BE POISONED BY BILLIONAIRES.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
