The future of the earth should be our priority. We, as humans, who've stolen this earth from the natural beings are responsible for preserving the health of it. And by building this data centre? Not only does it accelerate climate change but also destroy millions of habitats. This, is completely unacceptable. Climate change will become irreversible in just 3 years time if action cannot be taken, therefore this data Centre? CANNOT happen. We need to actively work to reduce climate change, not build unnecessary projects like this that will only make climate change 100× worse. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied. Approving this permit would be government-sponsored environmental racism. If the permit is not denied, a public hearing needs to be held in Santa Teresa.
